PROFESSIONAL SUMMARY

A Final-year B.Tech Information Technology student with hands-on experience in full-stack web development (Node.js, Express, MongoDB, React, MySQL) and AI integration (RAG pipelines, API, LLM-based systems). Built and deployed production-grade applications, including an AI-powered academic platform and multiple responsive web systems. Strong foundation in Java, Data Structures & Algorithms, DBMS, Operating Systems, and Computer Networks, with proven ability to independently design, build, and ship end-to-end systems.

EDUCATION

B.Tech, Information Technology — V.S.B Engineering College, Karur	2023 – 2027 CGPA: 8.4
12th Standard — J R C Hr. Sec. School, Kothayam	2022 – 2023 82.3%

TECHNICAL SKILLS

Core CS: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOP

Languages: Java, JavaScript

Web Technologies: Node.js, Express.js, React, REST APIs, HTML, CSS

Databases: MySQL, MongoDB

AI / ML: RAG Pipelines, Prompt Engineering, LLM Integration

Tools & Platforms: Git, GitHub, VS Code, Postman, Netlify, Vercel, Render

PROJECTS

StudentVault — AI-Powered Academic Intelligence Platform | *HTML, CSS, Node.js, Express, MongoDB, LLM, JWT/OTP* | [Git](#)

- Designed a role-based platform (Student, Staff, HOD, Admin) delivering AI-driven academic assistance through a RAG pipeline powered by LLM.
- Implemented secure JWT/OTP authentication with role-based access control across four distinct user roles.

Smart Government Scheme Awareness & Filtering System | *HTML, CSS, TypeScript* | [Live](#)

- Built a rules-based filtering engine that matches users to eligible government welfare schemes using age, income, occupation, and category inputs.
- Generated personalized, step-by-step application guidance to improve scheme discoverability for end users.

E-Commerce Website | *HTML, CSS, JavaScript, AI-Assisted Development* | [Git](#)

- Built a responsive storefront with product listing, category filtering, and cart/checkout flow.
- Refined AI-generated code manually to improve load performance and overall UX consistency.

INTERNSHIP EXPERIENCE

MERN Stack Intern — CodeAlpha (Remote) Jan 2026

- Contributed to a production e-commerce codebase, building UI components for product listing, filtering, and cart functionality.
- Used AI-assisted tooling to accelerate debugging and code review, shipping a deployment-ready build.

Software Development Intern — Infosys Springboard 5.0 (Remote) Dec 2024

- Built an automation tool to auto-download, extract, and organize daily NSE stock market reports, cutting manual processing effort.

CERTIFICATIONS

- Programming in Java — NPTEL
- Software Testing — NPTEL
- Java Foundation — Infosys Springboard
- Gen AI Fluency — Nasscom

ACHIEVEMENTS

- Built and presented KiranaLens, an AI-based credit underwriting tool, at TensorX 2026 National Level Hackathon, advancing through multiple evaluation rounds.
- Designed and deployed StudentVault, a production-grade academic platform, for real workflows at V.S.B Engineering College.
- Reached the National Level IEEE Hackathon Finals at IIITM Gwalior in the Web Technology domain.

SOFT SKILLS

- Problem Solving
- Teamwork
- Communication
- Time Management
- Adaptability
